

## REMARKS

Claims 47 and 48 have been added to the application so that claims 30-48 are now in the application.

As required by the Examiner the Applicants elect Species C claims 43-46.

New claims 47 and 48 read upon Species C and Fig. 5 of Applicants' drawings. Claim 47, which is dependent upon claim 44, recites:

" . . . . wherein as the filament spirals in said flat coil plane the filament continuously recedes from said central axis."

This recitation is a further limitation on the recitation in the second subparagraph of claim 43 which recites:

"forming said at least one coil layer with a filament which spirals in a flat coil plane which is parallel to said flat planar head surface and about a central axis which is perpendicular to said flat planar head surface and said flat coil plane;"

Claim 48, which recites the same limitation as claim 47, is dependent upon claim 46.

Should the Examiner have any questions regarding this document he is respectfully requested to contact the undersigned.

Respectfully submitted,

By:
